EDUCATION

Bachelor Of Computer
Application
MG University (2020 - 2023)

EXPERTISE

JavaScript
Node JS
Mongo DB
React
Redux

COURSES

- Mastering the Fundamentals
JavaScript – Scaler
- Node JS Course - Scaler

Jacob Louis

SOFTWARE DEVELOPER

Passionate IT professional with a fervent dedication to software development and a robust grasp of programming principles. Eager to enhance a dynamic IT organization with my expertise. Demonstrated capacity to swiftly grasp new technologies, delivering top-tier software solutions aligned with client needs. Adept technical skills and solid educational foundation poised to enrich team capabilities.

PROJECTS

Email-Thread-Analyzer

- The Email-Thread-Analyzer is a Node.js application that automatically responds to incoming emails from new senders when the user is unavailable.
- It is helpful for individuals who need to manage their emails effectively.
- The app is tailor-made to provide a seamless experience for both the user and the sender during the user's absence.
- It uses Google authentication and Gmail API, making it secure and reliable.
- Overall, it is a well-crafted and efficient tool that can make email management a lot easier for users.

MOVIE BOX

- Developed a React-based website, akin to the Netflix UI, to present comprehensive details on recently launched, popular, upcoming, and genre-specific movies.
- Utilized Redux and React Router to enhance user engagement and interaction, guaranteeing a smooth and effortless user experience.
- Implemented a robust backend on Node.js, empowering functionalities like secure authentication and authorization for users.
- Designed with user-friendliness in mind, the platform serves as an effective hub for users seeking streamlined access to diverse movie information.
